VISION & AMBITION

Since the beginning of 2009, the Amsterdam Street Art foundation (ASA) has been striving for the acceptance of street art as an art form. ASA introduces the most stunning Street Art from around the world to the people of the Netherlands, while at the same time showcasing Dutch Street Art to the rest of the globe. At the moment ASA is one of the biggest Street Art organizations on the planet. Backed by our huge network we offer young and upcoming artists a great stage to promote their works. For established artists we act as a professional agency, helping curate commissioned walls, events and many other projects that involve the artist and the client. Because of our incredible network of artists and creatives we can turn any request by the client into a successful product, event, exposure or collaboration.
